

# Pagina JavaScript event driven

```
<html>
<head>
<script language="JavaScript">
  function stampa_tabellina(n) {
    var i;
    var text = '';
    for (i = 1; i <= 10; i++) {
      text += n + ' per ' + i + ' fa ' + n * i + '<br>\n';
    }
    var p = document.getElementById('paragrafo1');
    p.innerHTML = text;
  }
</script>
</head>
<body>
<h1>Esempio di JavaScript</h1>
<form>
Inserisci un numero: <input type="text" name="expr" size="5">
<input type="button" value="Stampa tabellina"
onclick="stampa_tabellina(form.expr.value)">
</form>
<p id="paragrafo1">
</body>
</html>
```
